Pune, Maharashtra - 411033

Professional Summary

Results-driven and detail-oriented **Data Analyst** with **4 years** of experience in transforming data into actionable insights to support business decisions. Proficient in data collection, analysis, and visualization using advanced tools such as SQL, Python, Excel and Power BI. Adept at analyzing complex datasets, identifying trends, and presenting findings to both technical and non-technical stakeholders. Experienced in designing and implementing data models, optimizing processes, and delivering comprehensive reports to enhance business performance. Strong communication skills with a proven ability to collaborate across teams to solve problems and drive data-driven strategies. Eager to leverage expertise to drive successful project outcomes and foster team growth.

Skills

- **Skills:** SQL, Power BI, Python, Excel, Data Analysis, Data Visualization, Data Mining, Project Management, Statistical Analysis
 - **Cloud Platform (AWS)** – IAM, EC2, Lambda, S3, Virtual Private cloud (VPC), Relational Database Service (RDS)
 - **Tools:** Power Apps, Eclipse IDE, WinSCP, Jira, Polarion, VMware Horizon, Citrix Workspace
 - **Industry Knowledge:** Insurance, Banking, ALIP
-

Work Experience

Accenture — Application Development

Analyst April 2021 – Present

- **Data Collection & Analysis:** Utilized SQL to extract, clean, and analyze **large datasets** from multiple sources, ensuring data accuracy and completeness for key business reports and dashboards.
- **SQL & Database Management:** Designed and optimized complex SQL queries for querying relational databases **MySQL** to extract insights and automate data retrieval processes.
- **Power BI Dashboard Development:** Developed interactive, user-friendly Power BI dashboards and reports, enabling senior management to make informed, data-driven decisions with real-time performance tracking.
- **Data Visualization & Reporting:** Leveraged Power BI to create data **visualizations**, including charts, graphs, effectively communicating complex data trends and business insights to non-technical stakeholders.
- **Python Data Analysis:** Applied Python for data analysis and **manipulation**, utilizing libraries such as Pandas, NumPy, and Matplotlib to process and visualize data, automate repetitive tasks, and generate actionable insights.
- **Excel Data Management:** Expert in advanced Excel functions, such as pivot tables, VLOOKUP, INDEX-MATCH, and conditional **formatting**, for **analyzing** and reporting key business metrics.
- **Squirrel Database Management:** Utilized Squirrel SQL Client to connect, query, and analyze databases, supporting database administrators with data **extraction, verification**, and reporting tasks.

- **Data Cleansing & Validation:** Led initiatives to clean and preprocess large datasets, identifying and rectifying data anomalies, and ensuring consistency and quality across all analytical reports.
- **SQL Developer Collaboration:** Partnered with SQL developers to create and optimize stored procedures, triggers, and functions to automate reporting and data integration processes.
- **Business Process Optimization:** Identified data trends and recommended actionable improvements to optimize operational processes, increase efficiency, and drive business growth.
- **Training & Documentation:** Conducted internal training sessions on data analysis tools (Power BI, SQL, Excel) and created documentation for business intelligence solutions.

Relevant Project Experience -

- **Financial Forecasting Tool:** Built a predictive model for quarterly revenue using Python and visualized forecasts in Power BI. Improved forecasting accuracy, aiding in better budget planning and resource allocation
- **Life Insurance Claims Monitoring Dashboard:** I created an interactive Power BI dashboard to analyze claims data for AIG Corebridge, Allianz US, and Mass Mutual. Using SQL, I extracted and cleaned claims and policyholder data from their ALIP systems, customizing queries for each client. The dashboard displayed key metrics like claim frequency, trends, and claim amounts, with client-specific focus areas: **AIG Corebridge** on whole life claims, **Allianz US** on term life policies, and **Mass Mutual** on high-value claims. The interactive dashboard enabled better decision-making for claims management, policyholder segmentation, and forecasting.
- **Policyholder Retention Analysis:** Extracted policyholder data via SQL and Squirrel SQL Client, analyzing retention rates and identifying at-risk customers.
- **Automated Reporting System for Insurance Data:** Automated monthly insurance reports using SQL procedures and Python scripts, integrating claims and policy data for streamlined reporting. Reduced report generation time by 50%, providing faster insights to the underwriting team for quicker decision-making.

Education

Indore Institute of Science and technology

Bachelor of Computer science and engineering

CGPA: **8.7** | Year of Passing: **2020**

MP Board

10th Grade: Percentage **79%**

12th Grade: Percentage **72.3%**

Additional Information

- **Hobbies:** Dancing, Cooking, trekking
 - **Achievements:** Collaborated with marketing, sales, and finance teams to build custom reports and dashboards, resulting in improved alignment across departments and a 25% increase in project delivery efficiency, Automated weekly reporting processes using Excel macros and Power BI, cutting report preparation time by 50% and freeing up time for more in-depth analysis.
