

UMANG MANDHANYA

+91 6261458400 | umang.mandhanya30@gmail.com | Indore, Madhya Pradesh

SUMMARY

Dedicated MERN Stack Developer with expertise in designing and implementing full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in building modular, scalable solutions, optimizing frontend performance, and integrating RESTful APIs. Strong collaborator experienced with Agile workflows, version control, and clean code practices. Passionate about leveraging technology to improve system performance and user engagement.

TECHNICAL SKILLS

Frontend: React.js, Redux, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, TypeScript

Backend: Node.js, Express.js

Database: MongoDB, MySQL

Tools: Git, GitHub, Postman, VS Code

Concepts: API Integration, Authentication, CRUD Operations, Responsive Design, Performance Optimization

Languages: Java, C, JavaScript

EXPERIENCE

Frontend Developer — Vani Technologies

Indore, Madhya Pradesh | Feb 2025 – Present

- Engineered 5+ dynamic UI components using React.js and Tailwind CSS, cutting initial load time by 25%.
- Integrated and optimized RESTful APIs, improving data rendering speed and reducing latency by 20%.
- Collaborated with designers and backend teams to enhance UX consistency across devices, boosting user satisfaction.
- Implemented reusable component structures, reducing future development effort by 30%.

Trainee Software Developer — Gigatorb Software Pvt. Ltd.

Indore, Madhya Pradesh | Aug 2023 – Jan 2024

- Developed and optimized React-based dashboards with real-time API data updates, improving data visibility.
- Refactored legacy components to modern React syntax, decreasing UI bugs by 35%.
- Used Git and GitHub for version control, ensuring streamlined collaboration during sprints.
- Contributed to backend integration and API validation with Node.js and Express.js.

PROJECTS

Hospital Management System | MERN Stack

- Created a hospital management platform with modules for appointments, patient records, and scheduling.
- Implemented secure data handling using MongoDB and Express.js, improving backend query performance by 22%.
- Optimized state management in React to enhance dashboard responsiveness and reduce API calls by 15%.

ERP System | MERN Stack

- Built auditor management and qualification modules supporting role-based authentication and audit workflows.

- Increased data retrieval efficiency by 40% using indexed MongoDB queries and asynchronous API requests.
- Delivered a fully responsive interface aligned with accessibility standards (WCAG 2.1).

Online Coffee Shop Website | React.js, Tailwind CSS

- Designed a complete e-commerce UI with product listings, reviews, and contact modules.
- Achieved 35% faster rendering by using React hooks and lazy loading techniques.
- Applied modular styling with Tailwind CSS for consistent branding and better maintainability.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science

Sushila Devi Bansal College of Technology — Indore, Madhya Pradesh

Aug 2019 – May 2023 | CGPA: 8.03/10

12th (MP Board) — Shri Saibaba Public School | 74.6% (2019)

10th (MP Board) — Shri Saibaba Public School | 84.5% (2017)

CERTIFICATIONS

- Java Programming — Infosys Springboard
- SQL Fundamentals — Oracle DevGym
- C Programming — Programming World

ADDITIONAL DETAILS

Proficient in Agile development and Git-based workflows. Strong analytical, debugging, and problem-solving skills. Open to relocation and remote opportunities.
